Description

Duke (DK) series loudspeaker has been designed for multi-purpose. Includes DK10, DK12 and DK15 full-range loudspeakers and DK18S subwoofer.

DK15 is a high power, 2-way, full-range loudspeaker. It has a 1.4" Polyester diaphragm high frequency compression driver and a 15" Ferrite magnet low frequency woofer. 90° x 60° rotatable horn, can be easily installed as vertical or horizontal. Distinctive horn technology provides precise directivity to the range of loudspeaker coverage, especially off-axis response.

Duke Series loudspeakers are designed by European designers including selection of speaker driver, crossover network and cabinet structure. DK Series is recommended and greatly suitable for theatres or conference hall as PA speaker for its delicate, soft and elastic sound characteristics.
